**NOA Lot Check** [Edit] [Talk]

**NOA Lot Check** is a [Nintendo of America](#) subsidiary that checks over games made by first and third party publishers to make sure they're in compliance with Nintendo of America's guidelines. Occasionally they are mentioned in a game's credits, but this is very rare.

To launch a game on the [eShop](#), companies must submit a copy to them to then be sent to NCL for later checking before the game is finally put on the eShop depending what the publisher chooses for the release date.

**Plaintiff's contracts with third parties (explicitly  
shown before purchase).**

157

158

159 Before any purchase of Defendants equipment, they were made explicitly aware of  
160 Plaintiff's third party contracts:

161

162

That aside, we'll be releasing on every platform: Playstation, Xbox, Switch, Steam, GOG and possibly Stadia, but we're waiting to hear back from Google.

The villain in the game is Alexis Mincolla of industrial metal band 3teeth, so we have outreach through him and his community, game soundtrack by Ron Wasserman <https://www.imdb.com/name/nm2534328/> (the creator of the Power Rangers, X-Men and Dragon Ball-Z theme songs and soundtrack producer as well as 3,000 other shows) and some other unannounced people with some decent pull and outreach in the millions.

And like I said, we're debuting at E3 2020. So, that's a fairly large step. Release date if we get a handle on the mocap and get the actors all in-and-out should be shortly after E3 2020.

**The Next World**  
Video Game

I don't expect anything, you've already been generous enough, but right now I'm basically stuck with one suit and facial rig gear, and I need two that can work together. So whether I buy two of yours or I, against my better judgment purchase a second Noitom suit, that's a decision I need to make. But I totally appreciate your offer and would love to work with you.

**40% discount on equipment after disclosure of  
third-party contracts.**

199

200

201  
202

Defendant offered 40% off after being made aware of those contracts.

The screenshot shows a text message conversation. At the top, the contact name is 'Rokoko' with a blue checkmark and an information icon. The messages are as follows:

- Rokoko:** Best, RKK
- Rokoko:** The game debuts at E3 2020 so it'd be good exposure for you and we have some decent celebrity backing which will come in handy when the time comes. I have no problem with those stipulations. I won't be able to purchase the suit right this second, I have a lot of money going into development but i'm definitely interested in working with someone new.
- Rokoko:** If I purchased two suits at once, could a different discount be possible? My real goal i'm trying to get to is silent takedowns/cinematic quality 2+ person cut scenes, etc. Of course I could provide constant footage of the progress for you to use.
- RKK:** Hi Matthew,  
40% discount is one of the largest discounts we've ever given to a user. To go beyond that with the purchase of two suits, our team would need more of a commitment in regards to promoting content with the suit(s) and it'd have to be with an audience we know would have a lot of reach.  
What can you tell me about your following? How large is it? Which platforms are you most popular on? We'd love to check out those channels out if possible.
- RKK:** Best, RKK

203

basically stuck with one suit and facial rig gear, and I need two that can work together. So whether I buy two of yours or I, against my better judgment purchase a second Noitom suit, that's a decision I need to make. But I totally appreciate your offer and would love to work with you.

7/24/19, 4:31PM

Hi Matthew,

That all sounds great and we would love to be apart of this to help you during the development of your game. What have so far is really great and we believe that with our suit you can definitely push it even further.

I spoke it over with our team and our best offer we can give you for two suits would be to apply a 40% discount on each suit individually.

If this interests you, let us know and we can create a custom quote for you.

Best,  
RKK

7/24/19, 5:17 PM

Sure that is just perfect, thank you.

7/25/19, 9:38 AM

Hi Matthew,

Great! Can you provide me with your email address? We'll move communications there and our team will work on getting a custom quote over to you.

Best,  
RKK

204

# **EXHIBIT 8**

215

216

217

**Gen 1 animation vs Gen 2 Smartsuit.**

218

219 Rokoko Gen 1 animations were not the type of quality Defendant could resell  
220 cleanly. One year after Plaintiff purchased his equipment, Defendant released the  
221 the new Smartsuit gen 2, which produced animations at twice the frame-rate and  
222 made for commercially viable animations.  
223

The screenshot shows a web browser window with the URL `rokoko.com/insights/rokoko-launches-smartsuit-pro-ii-an-even-better-indie-mocap-suit`. The page header includes the Rokoko logo and navigation links: Capture Tools, Software, Use cases, Community, and Resources. The main content area features a breadcrumb link for 'All articles' and the article title 'Rokoko launches Smartsuit Pro II, an Even Better Indie Mocap Suit'. Below the title, it shows the date 'December 6, 2021', a '5 min read' indicator, and the author 'By Matias Søndergaard, Rokoko Co-Founder & CPO'. Social media sharing icons for Facebook, Twitter, LinkedIn, and Email are present. The article text begins with 'entire workflow. One thing that's stayed the same; a lightning-fast one-minute calibration setup.' and lists 'Key performance upgrades include:' followed by a bulleted list of features: 'Ready for Multi-Level Tracking, so you can track elevation movement on stairs, ladders, and along the y-axis.', 'Optimized for high impact use so punching, fighting, and falling doesn't compromise data quality.', 'Better locomotion accuracy over time, catering for a significant reduction in drift, meaning more reliable and longer streaming times.', and 'Native integration into the Rokoko Smartgloves, so only one portable USB-C battery is required to power your entire motion capture system.'

224

225

As the cherry on top, we've extended general performance all around. Sensors have been upgraded, bringing the maximum recorded frames per second up from 100fps to 200fps, which results in more accurate data when performing fast paced motions.

226

### Improvements

- **Better locomotion and high impact tracking** 200 FPS motion capture combined with 16 g accelerometer measurement range means that you can capture fast and high-force movements in higher quality
- **Native Smartgloves integration** Power your Smartsuit Pro II and Smartgloves with one battery
- **Better accuracy over time and less drift** Updated and more precise sensors in Smartsuit Pro II will reduce drift and enable you to capture longer takes at high quality
- Updated LED feedback on the Smartsuit Pro II Hub
- Stability improvements

244  
245

246 Defendant released statements on the issue and admitted the firmware is the cause,  
247 however, their developer logs show they *knew it broke the gloves and suit hubs* and  
248 *then* released it.

Smartgloves have Incompatible Firmware

Smartglove shows up as a Smartsuit Pro in Studio and Serial Number looks corrupted

Smartgloves Not Appearing in Rokoko Studio

Smartgloves in Bootloader Mode

Unable To Connect To 5GHz WiFi Network

## Smartglove shows up as a Smartsuit Pro in Studio and Serial Number looks corrupted

Who is this article relevant to?  
This article is for customers who noticed that their Smartglove is showing up as a Smartsuit Pro or as another Smartglove (Left Smartglove becomes right and vice versa)

Which products is this article relevant to?  
Smartgloves

In some (rare) cases Smartgloves fail during a firmware update and they lose their Device Information.

This will result in either of the following:

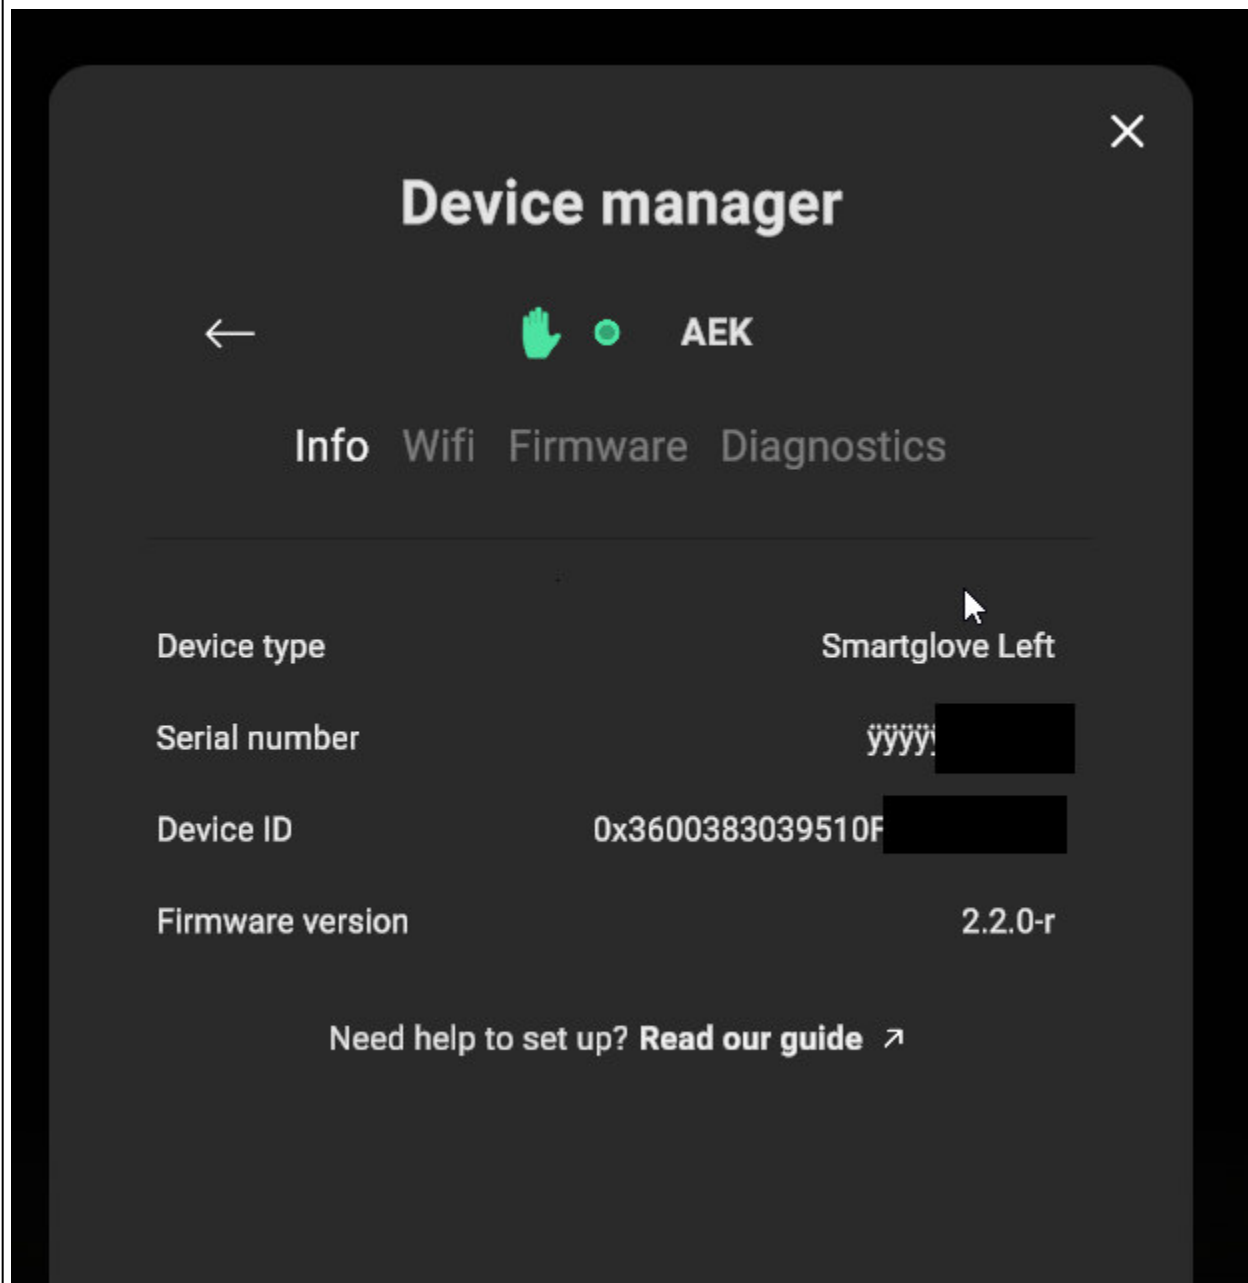

- Your Smartglove will appear as a Smartsuit Pro II in Rokoko Studio
- Your Smartglove will appear as the wrong Smartglove (Right Smartglove will be detected as the Left one and vice versa)

If you open the Studio Device manager and you see that Serial Number is missing or seems corrupted (see screenshot below as an example), please contact support@rokoko.com.

Rokoko purposely RELEASED this firmware knowing it broke gen 1 gloves and suits

Aug 29, 2023, 02:17 GMT+3

I finally got around to doing this.

No change. It says sensors are stuck in mixed modes. I have followed all guides but nothing works 😞

I never had any issues with these suits until the day I upgraded the firmware for the first time ever; since then, they are unusable.

Please help 😞

Unnecessary remote support sessions with users and asking for logs, when they secretly were receiving live diagnostics constantly

Hi Matthew,

Let me help you with this!

I think we should go on a **remote** session to fix the issue **remotely**.

You can book a day and time here: <https://calendly.com/d/yn5-4cx-xks/45-min-troubleshooting-rr>

Please download Anydesk [here](#) and provide me with the address shown in red below before the session.

Note: **Windows OS** is required.

I finally got around to doing this.

No change. It says sensors are stuck in mixed modes. I have followed all guides but nothing works 😞

I never had any issues with these suits until the day I upgraded the firmware for the first time ever; since then, they are unusable.

Please help 😞

Hello Matthew,

I hope you are doing well today!

I am here for you! Let's check what the issue may be 🙏

Please provide me a Hub Log, as per the instructions below:

**Hub Log**

Open Rokoko Studio and connect the Smartsuit to a computer with the external USB-C provided by us.

- Click on "Configure" on Device Manager.

Hi Matthew,

Thank you for your patience.

Here is a link to track the delivery: <https://mydhl.express.dhl/dk/en/tracking.html#/results?id=7604427213%0D%0A>

Please follow the instructions in the previous response and let us know if everything is fine!  
Please raise a new ticket or email us at [support@rokoko.com](mailto:support@rokoko.com) since I will be out of the office.

Have a great evening!

Hi Matthew,

The **logs** indicate cabling issues. I understand that you may have already replaced some cables previously, but as you have pointed out, this was two years ago. Perhaps those cables have now had extensive wear and tear, or perhaps they were not correctly connected.

If it is your preference, instead of providing you with the cables, we can arrange for your suit to be shipped back to our HQ and for our repairs coordinator to replace the cables for you (and also inspect the physical hardware to identify any other potential faults).

Dan,

Thanks for the reply, but we've already gone in circles on the cables. The suit hasn't been operational since March 2023, and this exact issue was previously diagnosed and acknowledged. Suggesting "wear and tear" on cables that haven't been in use for over two years is dismissive and inaccurate.

Your offer to "inspect" the suit at HQ is not acceptable. If we reach the point — again, for the second time — where it turns out the issue isn't cabling, we'll be hit with more delays because "replacement parts" like sensors or the hub aren't even in stock. That in itself is a legal failure — as stated in the legal complaint, you are required to stock serviceable parts for a reasonable duration after sale. You don't. You won't. You can't.

333

334

335

336

# **EXHIBIT 14**

337

338

**Firmware destruction of sensors and refusal  
to replace.**

339

340

341 In 2025, Defendant ultimately admitted the firmware [can] destroy the sensors and  
342 only Defendant can fix them, and to reach out. When you do reach out, they simply  
343 require you to purchase a new Gen 2 suit and refuse repair/replace/refund.

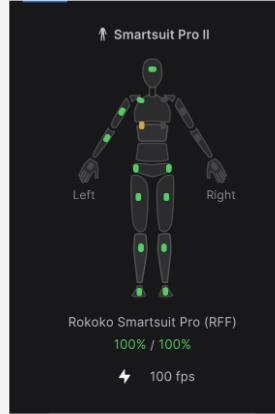

The screenshot shows a web browser window with the URL [support.rokoko.com/hc/en-us/articles/4410479064849-Some-or-all-of-the-sensors-on-the-Smartsuit-Pro-do-not-work](https://support.rokoko.com/hc/en-us/articles/4410479064849-Some-or-all-of-the-sensors-on-the-Smartsuit-Pro-do-not-work). The breadcrumb navigation is 'Rokoko → Troubleshooting → Smartsuit Pro'. The article title is 'Some or all of the sensors on the Smartsuit Pro do not work'. A red annotation points to the text: 'The forced update ---> and corresponding firmware.' The article content includes a section 'Who is this article relevant to?' with the text: 'This article is for anyone who managed to connect their Smartsuit Pro I or Smartsuit Pro II to Rokoko Studio and noticed that some or all of the sensors don't work.' Below this is 'Which plans is this article relevant for?' with the answer: 'Starter Plus Pro Enterprise'. A section 'Sensors will not work for the following reasons:' is followed by a numbered list: 1. 'During a firmware update, some or all the sensors got stuck in bootloader mode.' (highlighted with a red box), 2. 'A cable is connected to a sensor is faulty or physically damaged.', and 3. 'Sensors have lost their calibration values or are physically damaged.' The text continues: 'During a firmware update, sensors can get stuck in bootloader mode. This can, for example, be caused by unplugging the USB-C cable before the'.

344

support.rokoko.com/hc/en-us/articles/4410479064849-Some-or-all-of-the-sensors-on-the-Smartsuit-Pro-do-not-work

This results in **not fully functioning sensors** that are constantly **blinking green** or lighting blue (physically, not inside Rokoko Studio) and are displayed grey or white in the Rokoko Studio diagnostics panel.

Below is a screenshot example of some sensors being unresponsive:

Things to try:

- 1 Perform a power cycle by unplugging and replugging the power bank from the Smartsuit Pro Hub. Please try this up to 5 times. We recommend waiting for 10 to 30 seconds before each power cycle.
- 2 If the above process does not fix the issue, please contact [support@rokoko.com](mailto:support@rokoko.com) and provide the necessary [log files](#) for further inspection from our Support team as shown [here](#).

Unnecessary support sessions where Rokoko requests log files, even though they secretly receive diagnostic logs through live hidden communications ----->

After you generate the logs, use this [Sensor Checker Guide](#) here to check which sensors are missing. It will indicate all the sensors that are missing. Make sure you use a valid file with only the latest entries inside the log.

345

• USB devices will not connect on Intel-based Macs (OS-level issue; not something we can fix)

• Some users may experience that they need to allow incoming connections every time they open Rokoko Studio, and not just on the first launch.

• On some Mac computers, Rokoko Studio may crash if you resize the window.

• When running in full-screen on Mac, Studio will open up in the same resolution that it was previously closed in, causing black bars on the sides.

### Device Setup & Configuration

• If you re-install firmware on a Smartsuit Pro, where some sensors are in the bootloader state and some are not, firmware will not be re-installed for the sensors and an Error 37 will be shown. This does not break anything, but does also not fix the sensors. Please contact Support for help to restore the sensors - we're working on getting this properly restorable from within Studio.

• Smartgloves cannot find 5 Ghz networks running on some channels, likely all channels at 52 or higher. As a workaround, use one of the following channels for now 48, 44, 40, 36.

• Rare issue where rapidly toggling Boost Mode on/off can sometimes set sensors in a bad state.

• Devices cannot always connect to Wi-Fi routers running on 802.11ax. Changing it to 802.11ac will fix the issue.

### Offline Mode / Sync Framework

• When you're offline, you can't see any pending changes to-be-synced in the sync status panel. These will show up when you start up online and the syncing process start. This is purely a visual bug.

### Actor Profile & Presets

## I Hate My Rokoko Suit

Edit: Finally got refunded August 7th. Tried 3 different methods, team seemed to be out of office pretty frequently. A ton of emails exchanged. Overall I'm just glad I didn't send in the suit to never get a refund, but it took so long that I really believed that was going to be the case for a while. Lost a couple hundred to PayPal fees.

Edit: Been waiting on a refund since May 24th when they received the suit and communicating with their team since May 9th. 😊 it's currently June 14th. I'll update when it goes through, but it's been a process. They tried to refund me a lot less than I paid so I sent them the invoice which was for around 5k. They tried saying it was for half now and half once they received the suit, but I never got half of the refund. I'm bummed it's taking so long tbh, but I'm hopeful.

Original post: This thing is a trouble shooting nightmare and it's probably the worst money I've spent in my life. I've tested it 3 times and had issues troubleshooting every time, but figured it was something I could fix on my end. Until today when 75% of my censors just stopped working. I found it was a hardware issue. I literally haven't gotten anything usable out of this suit.

This thing has only brought me stress and I may as well have animated from scratch or used something like move ai. It works worse than your free ai mocap tool. I'm just devastated and I wish I could get my money back but according to the refund policy I can't since it's been over 30 days (Really, not even 90?).

Your customer service you have to pay extra money just to talk to a person on the phone 'for a limited time'. I can see why because I'm sure you have a ton of people disappointed in this product. Also doesn't track well with magnets or too much metal in the room? Come on. 😞

I couldn't even imagine selling this thing to someone with a good conscience. To be fair I actually like the gloves (except they stop working for me if I put anything metal in my hand like an iPhone) but that's sadly the only good thing I can say about it. Don't waste your money on this thing, I wish I did more research on it. If I knew I was paying 5k for a panic attack I would've just not.

You need a dedicated router, a recommended power supply, and if you're using a third party software any plugins you need may cost extra money. For example character creator live link costs \$600 on top of the thousands you may spend on the suit. Then to do livestream data you need to pay for a monthly subscription on top of it all. My sleep paralysis demon wears a rokoko suit.

Locked post. New comments cannot be posted.

Hi Matthew,

Thank you for reaching out to Rokoko support. Let me help you with this.

It seems that the **firmware** update of the Smartglove failed - there should be a yellow button on your Smartglove.

Please follow the instructions in this article, in order to fix your Smartglove: [Smartgloves Firmware Fails – Rokoko](#). This script actually installs the latest **firmware** in your gloves, so feel free to apply it to your other Smartglove too (even if the **firmware** did not fail). Please have Studio closed and only one Smartglove connected to the computer per time. Also, the Smartsuit needs to be disconnected from the computer.

After you updated successfully both Smartgloves, you can set up the WiFi settings.

I finally got around to doing this.

No change. It says **sensors** are stuck in mixed modes. I have followed all guides but nothing works 😞

I never had any issues with these suits until the day I upgraded the firmware for the first time ever; since then, they are unusable.

Please help 😞

Re-tooling and re-development required to match new SDK and hardware specs.

The screenshot shows a Google search page with the query "is the switch sdk the same as the switch 2". The search results include an "AI Overview" section with the following text: "No, the Nintendo Switch SDK and Switch 2 SDK are **not the same**, though they share a foundation; the Switch 2 SDK offers enhanced tools and performance targets for its more powerful hardware (new Nvidia chip, more RAM), allowing for better graphics and features, but maintains backward compatibility so existing Switch games largely run, while the new SDK focuses on enabling next-gen potential. Developers use the original Switch SDK for the current console, while the newer, evolving Switch 2 SDK provides access to the next-gen hardware's capabilities, with Nintendo controlling distribution to manage quality and focus." Below the text is a video player with the title "SWITCH 2 DEVELOPMENT!?" and a thumbnail showing a man holding a Switch console with a question mark on it. The video is from the channel "Oranaepixel" and has a duration of 57s.

460

how much would it cost development wise to upgrade a game like watch dogs from the swi

AI Mode All Short videos Forums News Shopping Images More Tools

AI Overview

The internal development cost for upgrading a complex, large-scale game like *Watch Dogs* from the original Switch to the Switch 2 would likely be **over \$1,000,000 USD**, though this is a general industry estimate, and the actual cost for Ubisoft is confidential.

This cost is highly variable and depends on several factors:

- **Scope of the upgrade:** Simply making the game run on the new hardware (due to backward compatibility) requires minimal effort, but enhancing performance (framerates, resolution, loading times) or adding new content requires significant development time.
- **Team size and expertise:** The size of the development and Quality Assurance (QA) teams dedicated to the port, and their experience with the new hardware, directly impact the budget.
- **Game complexity:** As an open-world AAA title, *Watch Dogs* has complex mechanics and extensive content, which makes optimization more challenging and expensive compared to smaller games.
- **Engine and tools:** The game's engine (Ubisoft's Disrupt engine for the first *Watch Dogs*) and whether existing tools are compatible with the Switch 2's Software Development Kit (SDK) can affect the efficiency of the porting process.
- **Licensing and compliance:** There are costs associated with platform-specific licensing, third-party libraries, and meeting Nintendo's technical certification standards.

For consumers, Nintendo's pricing for upgrades has varied:

- **Free** for simple visual/performance enhancements in some first-party games like *Super Mario Odyssey*.
- **\$10 USD** for performance and visual upgrades in titles such as *The Legend of Zelda: Breath of the Wild*.

563 animation data, holding it hostage for their uses.

support.rokoko.com/hc/en-us/articles/18877624744721-Rokoko-Studio-Export-options-and-file-formats

This article is for anyone who wants to know more about the export options and file formats in Rokoko Studio

Which plans is this article relevant for?

Starter Plus Pro Enterprise

### Requirements

In Rokoko Studio, you can export your animations using a variety of settings.

For example, exporting to FBX format is available on all Rokoko Studio subscriptions although some specific settings require a paid subscription. Exporting in CSV, BVH format and in a 60 FPS require a paid subscription.

Please note that you can use the advanced export options only if you have a premium subscription of Plus or higher as explained [here](#).

In this article, we will go through what each export option does and what it means.

630

631

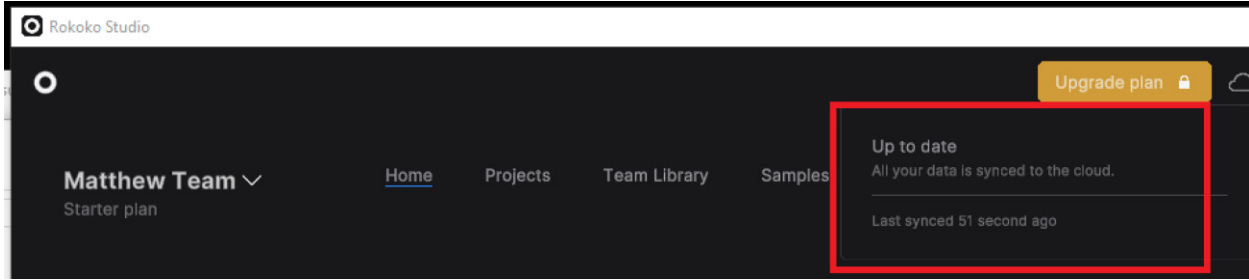

632

**Harvested intellectual property.**

633

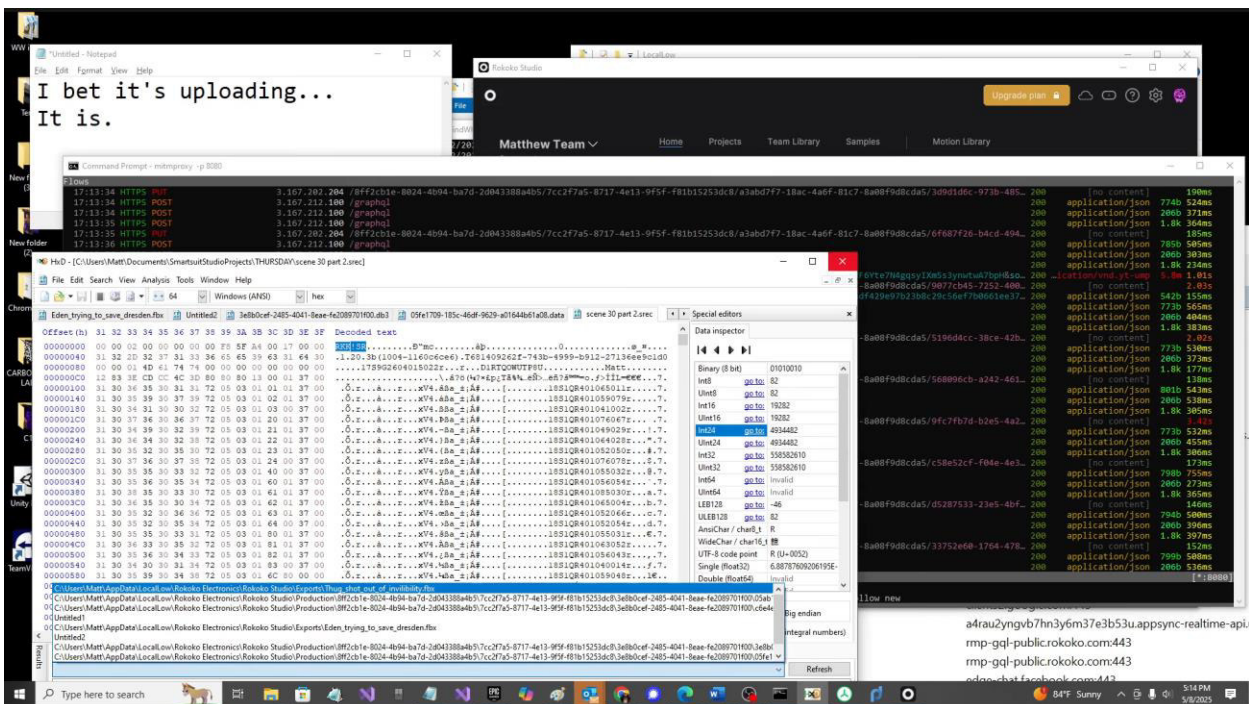

634 Evidence of the harvesting of Plaintiff's intellectual property

635

636

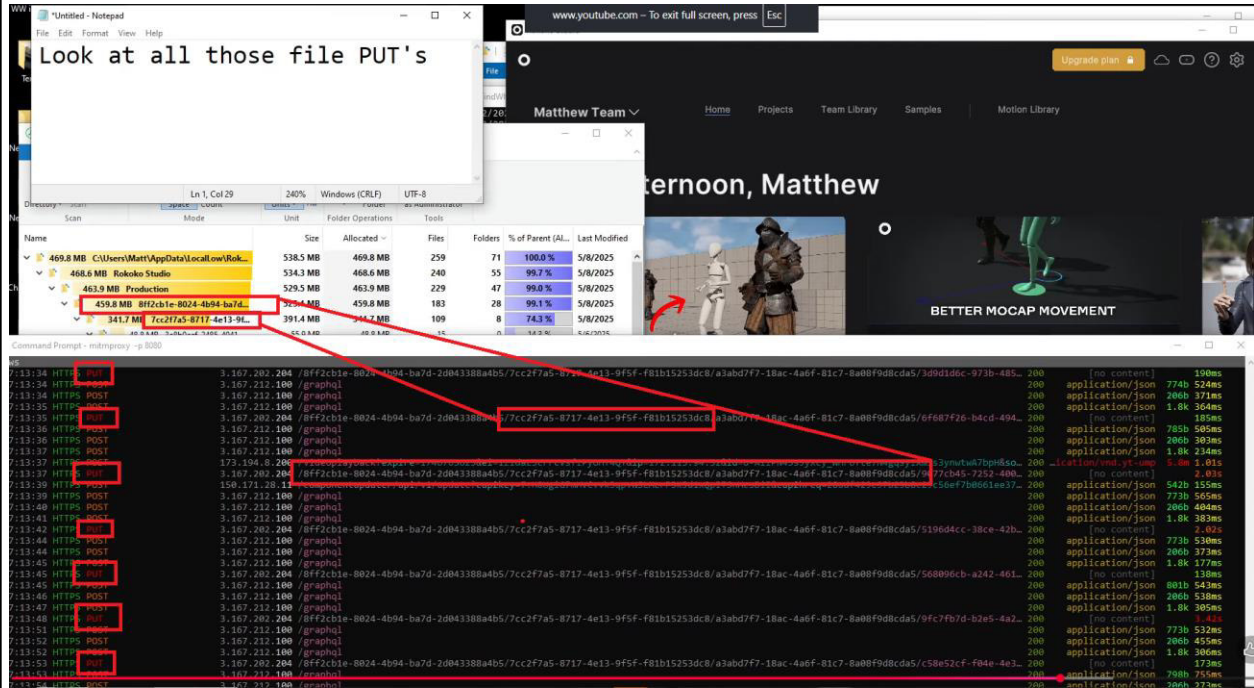

637 CMI exists within the files:

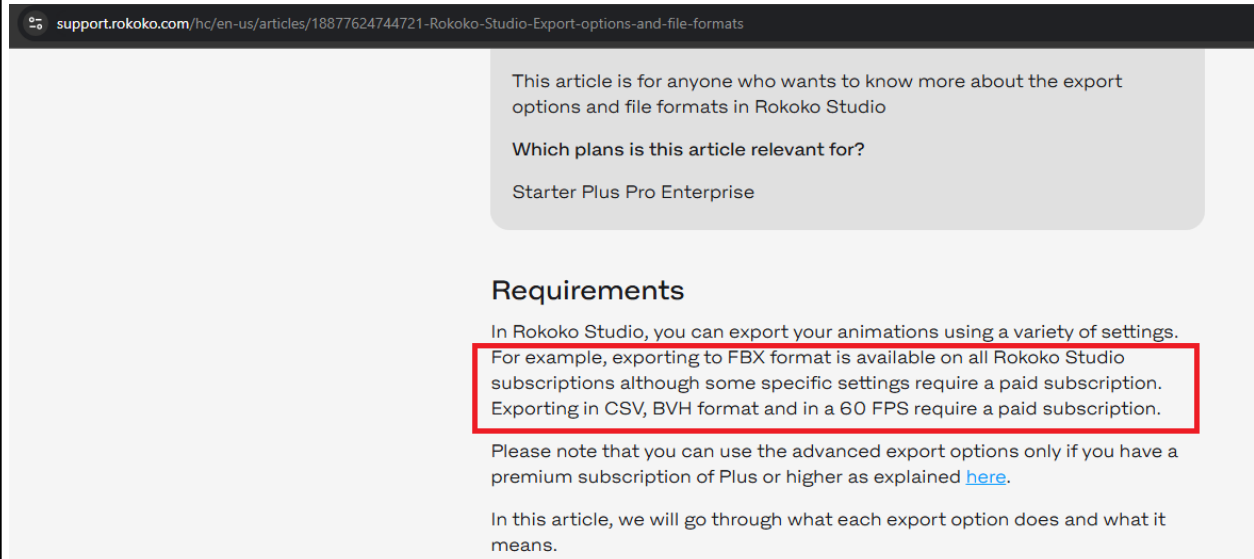

638

639

640 Defendant taking the files (and then deleting the originals afterwards, so they have  
641 the sole copy):

642  
643 Once Defendant deletes your original files, they then hold your data hostage and  
644 do not allow you to even export it without paying them for your data back:

646

647

648

649

650

651

# **EXHIBIT 33**

652

653

**Defendant's admission of harvesting.**

654

655

656 Defendant licensed Plaintiff's intellectual property to Naver-Z/Zepeto for their  
657 Metaverse project, the parent company generates over \$1.2 billion USD per year  
658 and invested millions into Defendant for this access (Exhibit 33)

659

660 From 2022:

## Future vision

- Core vision: Become the backbone of all digital human motion
- Metaverse opportunity: Rokoko is the missing link to create "virtual presence" in the Metaverse, i.e. natural and untethered human motion

661

662 Naver-Z launched a fund:

user-generated virtual space that's the rough equivalent of Roblox's "Experience", is 30 minutes.

Zepeto has users around the world, but particularly among female teenagers and early twenty-somethings in South Korea and China. Given its target demographics, it's no surprise designer brands like Gucci and Ralph Lauren, as well as celebrities Blackpink and Selena Gomez, have tapped Zepeto to construct their own branded digital experiences. Designer accessories that are prohibitively expensive for most people in real life are suddenly more affordable in Zepeto's virtual world.

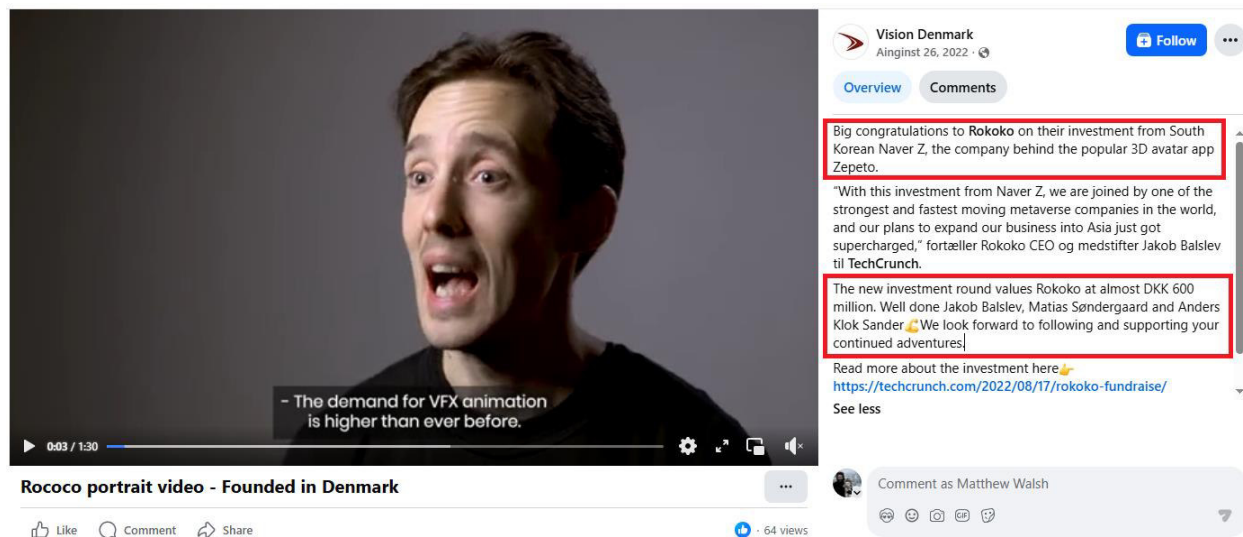

The \$100 million creator fund will allow Zepeto to diversify the range of "metaverse" experiences it supports. Naver Z plans to take equity stakes in promising studios using the Unity plugin to generate 3D experiences on Zepeto, while it will also dole out cash rewards for high-potential Zepeto creators using the plugin, judging on performance metrics like plays, visits, and active users (those interested can apply via dl\_ecofund@naverz-corp.com with links to their dev portfolio, said Lee).

The initiative arrives on the back of Naver Z's hefty \$190 million Series B fundraising round last year, which was led by SoftBank Vision Fund II and joined by Mirae Asset, major K-pop talent agencies, and other investment firms.

663

664

Naver-Z then invested bringing the value of Rokoko to DKK 600M in 2022

665

666 DocuSign events show ongoing contracts being signed between Rokoko and  
667 Naver-Z

717

**Keep-alive NAT hole-punching code used for  
persistent access.**

718

719

720  
721  
722

Defendant using keep-alive NAT hole punching along with MQTT to ensure they can always connect in and access the web/file server they built.

```
// Decompiled with JetBrains decompiler
// Type: TeamSharingMQTTnet.Server.MqttClientKeepAliveMonitor
// Assembly: teamsharing-mqtt, Version=1.0.0.0, Culture=neutral, PublicKeyToken=null
// RID: 9f17c505-4f98-4ae3-8613-0e44ad86e81
// Assembly location: D:\Program Files (x86)\Rokoko Electronics ApS\Rokoko Studio\Rokoko Studio_Data\Managed\teamsharing-mqtt.dll

using System;
using System.Diagnostics;
using System.Runtime.CompilerServices;
using System.Threading;
using System.Threading.Tasks;
using TeamSharingMQTTnet.Diagnostics;
using TeamSharingMQTTnet.Packets;

#nullable disable
namespace TeamSharingMQTTnet.Server;

public sealed class MqttClientKeepAliveMonitor
{
    private readonly Stopwatch _lastPacketReceivedTracker = new Stopwatch();
    private readonly Stopwatch _lastNonKeepAlivePacketReceivedTracker = new Stopwatch();
    private readonly string _clientId;
    private readonly Func<Task> _timeoutCallback;
    private readonly IMqttNetLogger _logger;
    private Task _workerTask;

    public MqttClientKeepAliveMonitor(
        string clientId,
        Func<Task> timeoutCallback,
        IMqttNetLogger logger)
    {
        this._clientId = clientId;
        this._timeoutCallback = timeoutCallback;
        this._logger = logger;
    }

    public TimeSpan LastPacketReceived => this._lastPacketReceivedTracker.Elapsed;

    public TimeSpan LastNonKeepAlivePacketReceived
    {
        get => this._lastNonKeepAlivePacketReceivedTracker.Elapsed;
    }

    public void Start(int keepAlivePeriod, CancellationToken cancellationToken)
    {
        if (keepAlivePeriod == 0)
            return;
        this._workerTask = (Task) Task.Run<ConfiguredTaskAwaitable>((Func<ConfiguredTaskAwaitable>) () => this.RunAsync(keepAlivePeriod, cancellationToken).ConfigureAwait(false)), cancellationToken);
    }

    public void WaitForCompletion()
    {
        if (this._workerTask == null)
            return;
        Task.WaitAll(this._workerTask);
    }

    private async Task RunAsync(int keepAlivePeriod, CancellationToken cancellationToken)
    {

```

Studio uses MqTT for abstraction of connection functionality.

On top is their layer for the TeamsSyncWebsocketServer

This system is used as a keepalive function after hole punching through NAT. This allows the port to remain open to the public where external parties can connect in, send commands and download files from the machine -- any file.

Rokoko decides how long it wants to allow you to use the software offline for until it forces you to sync to their servers where they can take your data.

736

737  
738

Defendant admits to forcing users back online to “sync” their intellectual property.

access the content or the latest version of it on another computer, unless it's been synced to the cloud.

### How does Offline Mode work?

In order to access Offline Mode in Rokoko Studio, you'll need to have first logged in to Studio on the device you want to go offline with. This naturally requires an internet connection.

Once Studio has loaded after logging you, you can go offline, both while the application is running and starting it up again. During this period, all your content and changes will continue to be stored locally, but nothing will be synced to the cloud and thus not available on other devices. Rokoko Studio will automatically start to sync the data again when you go back online.

Offline Mode does have some limitations. Depending on your Rokoko subscription plan, you can only remain offline for a certain amount of days (see our [pricing plan](#) for details). To renew your 'offline period', you will just need to go online with Rokoko Studio, ensure it has connected and synced, and then you can go back offline.

While you're offline, you should have access to the same features and functionality as usual, except anything that fundamentally requires you to be online to access it, such as the Motion Library. You will also only have access to scenes and scene data that you have previously synced/downloaded to your device. For example, if you have a scene that you created on another computer, it won't be synced and downloaded unless you open it first on this computer, and only at that point will it be accessible offline.

### How is my cloud-stored data used and protected?

Rokoko Studio is using Amazon Web Services to store all the synced data and content, and is thus protected using

747

**False GDPR compliance and U.S. servers.**

748

749 Defendant falsely states they are GDPR compliant and their software uses German  
750 servers, that is not true. Their code only contains U.S. based servers.

Rokoko Studio - Offline Mode & x + Gemini | - □ ×

← → ↻ support.rokoko.com/hc/en-us/articles/14897573141009-Rokoko-Studio-Offline-Mode-... ☆ | 🗑️ 🔍 📄 🗑️ 🗑️ Finish update ⋮

fundamentally requires you to be online to access it, such as the Motion Library. You will also only have access to scenes and scene data that you have previously synced/downloaded to your device. For example, if you have a scene that you created on another computer, it won't be synced and downloaded unless you open it first on this computer, and only at that point will it be accessible offline.

### How is my cloud-stored data used and protected?

Rokoko Studio is using Amazon Web Services to store all the synced data and content, and is thus protected using Amazon's world-class cloud service infrastructure and security. We are currently using the US-East-1 (Virginia, USA) and EU-Central-1 (Frankfurt, Germany) servers for our data storage.

Your data and content will not be shared with any external parties and may only be anonymously utilized by Rokoko for data analysis in order to improve our products and services. In other words, you will never see your cloud-synced animations and motion capture be utilised by anyone else, even Rokoko. You can read more about this in our [Data Privacy Policy](#).

Super disappointed with Rokoko, a company whose motion capture tech we've used on multiple projects at Hinterland.

Their freshly updated terms of service require us to share our mocap data for the purposes of, amongst other things, training their AI.

The only way to opt out: spend more money on a higher software tier that doesn't upload to their cloud so they can't automatically process it. We'll be paying for the higher tier because we need the software for one of our projects and don't want our data processed against our will, but once it's done we'll be selling this equipment and never using Rokoko again.

Shame on you for screwing your customers to try to get ahead. You don't deserve our money.

We had lots of conversations about "ethically sourced training data" and unethical - usually defined as stolen. But.. this feels pretty damn unethical - holding customers hostage for insane fees or take something that doesn't belong to them to further grow their business. Of course, unethical seems to be the way to do business in the US right now, at least based on what' ...more

That's wild, seems like these agreements start to break privacy laws and another company's IP.

798

# **EXHIBIT 40**

799

800

801

**Plaintiff never subscribed to "Teams" but  
data was still collected.**

802

803

804 Defendant cannot hide behind the defense that the collection of his intellectual  
805 property was part of their 'Teams' subscription service, as, Plaintiff never signed  
806 up for teams, never paid an additional dollar in subscription or services to  
807 Defendant after purchase, yet, their software continually collected his intellectual  
808 property for years.

811  
812  
813  
814

The process to creating a team with the software Plaintiff acquired was, if you *choose to*, log into the Rokoko website and add ‘creators’ for \$50/mo

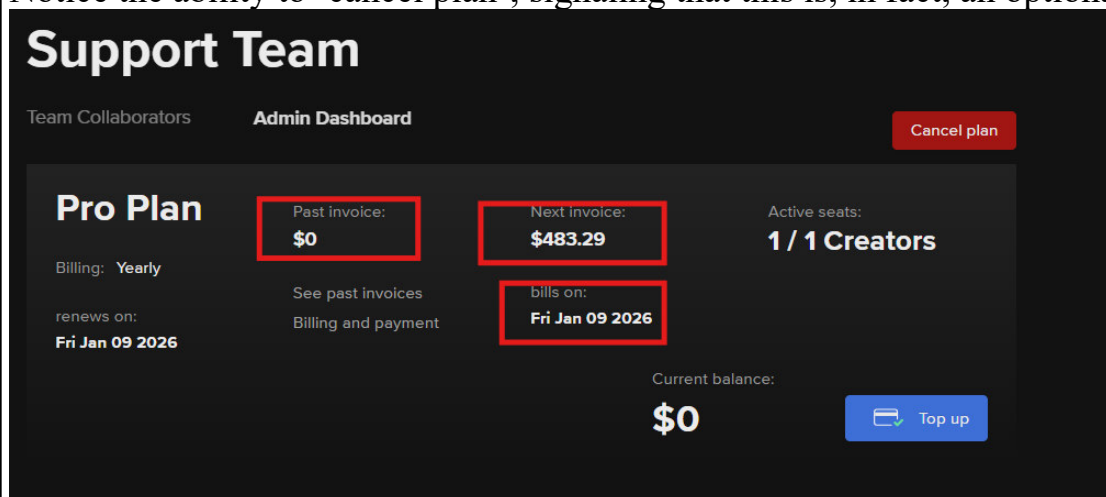

815  
816

817 Then supply your billing information and pay the \$600 + \$50/mo. This never  
818 happened, Plaintiff never provided Rokoko with *any* payment information after the  
819 purchase and never begun nor completed any of these steps.  
820

821  
822 Notice the ability to 'cancel plan'; signaling that this is, in fact, an optional service  
823

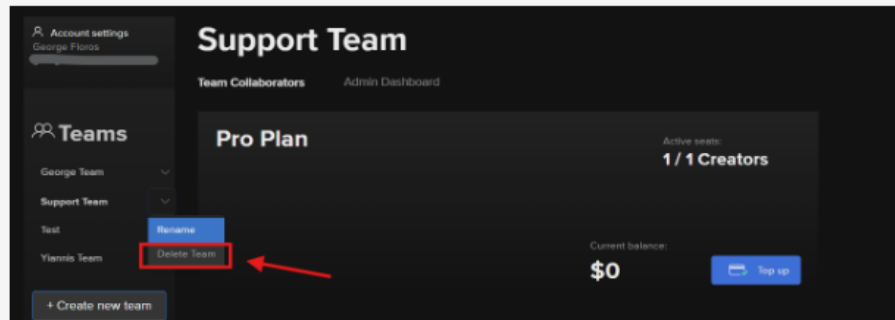

824  
825

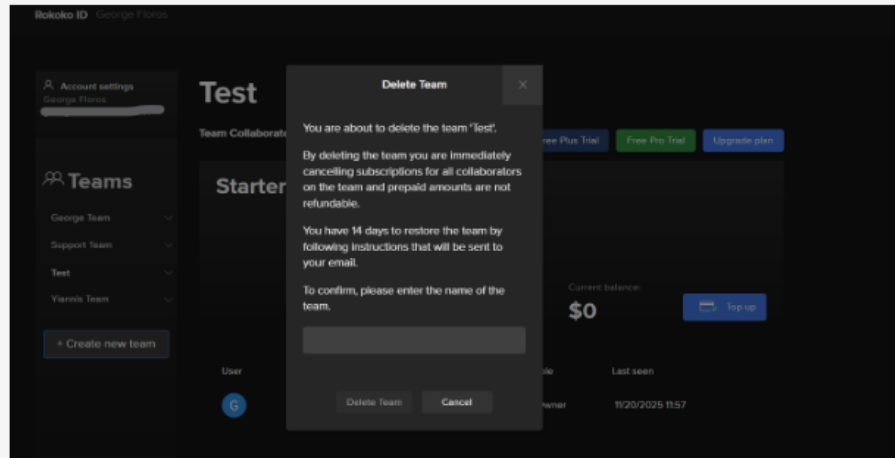

## Deleting a Team

Only Team owners can delete their team. Performing this action cancels all current subscriptions immediately, and hides the team for all members. It can be restored within 14 days by clicking a link that is sent to the owner(s) via email. After 14 days the team is erased. Any existing account balance is also lost.

An example of a team being deleted:

## Top up your wallet (For purchasing Motion Library assets)

In order to purchase Motion Library assets you need to have available funds in your team balance. [This portion of our video tutorial](#) walks you

**Hardcoded authentication bypass in the software.**

835

836 Defendant's code contains a hardcoded authentication bypass, inserted by a former  
837 employee that has been present for over three years.

```
authentication_loginProcess = new Process();
try
{
    if (authentication_pubApi != null && !testContext)
    {
        RmpRequestTokenInfo requestToken = await authentication_pubApi.CreateRequestToken("STUDIO102");
        authentication_requestId = requestToken.request_id;
        requestToken.family_name = "";
        requestToken.given_name = "";
        authentication_idUrl = RokokoUrls.GetEnvironmentUrl(authentication.Environment);
        authentication_idUrl = $"{authentication_idUrl} request_id={authentication_requestId}";
        authentication_loginProcess.StartInfo = new ProcessStartInfo(authentication_idUrl);
        authentication_loginProcess.Start();
    }
    else if (testContext)
    {
        RmpRequestTokenInfo requestToken = await authentication_pubApi.CreateRequestToken("STUDIO102");
        authentication_requestId = requestToken.request_id;
        RmpRequestTokenInput requestTokenInput = new RmpRequestTokenInput();
        RNGCryptoServiceProvider cryptoServiceProvider = new RNGCryptoServiceProvider();
        byte[] inArray1 = new byte[30];
        byte[] inArray2 = new byte[30];
        byte[] inArray3 = new byte[30];
        byte[] data = inArray1;
        cryptoServiceProvider.GetBytes(data);
        authentication_session = new UserSession()
        {
            userId = UserId.FromString("7de6a28a-d806-405b-b391-80b20f9091b0"),

Hi Matthew

Thank you for sharing the complaint. We have read it in full and want to share our initial response - we can come back with more details later. Generally, we see that it relies on a number of misunderstandings and misinterpretations of observations, which we are able to easily clarify and explain. We believe both parties will benefit from us doing this, as it will save us all a lot of time and effort.

A few non-exhaustive, short but important comments:

- **We have never misappropriated yours, of any other users, intellectual property.** We have always been transparent in how we use and treat user motion data through our Terms of Use. We continued this path earlier this year, when we made and communicated an update to these. Still, to date, no commercial licensing of any user motion data has been done. Also, no user data has to date been used for any of our products. This is easily verifiable.
- **Formation of “Coco Care” is not to shield liability in any way.** “Care” evolved as a research project in Rokoko. It was run by a dedicated team and had nothing to do with the motion data generated by the creators using our tools. When the project matured, it was spun off as a separate legal entity along with the tech that the Care team had developed. Today, it has no affiliation with Rokoko and we therefore also required that they changed the company name to avoid confusion. All parties involved from including the team, legal counsel and accountants will confirm this.
- **We do not make fraudulent representations.** We do have inventory with a third party logistics provider (however, we are handling the more complex repair cases from our main office, which is why the repair case shipping refers to this location), we do have offices (and the Copenhagen office is not in a basement, but over the 4 floors in the building behind the basement), we do not have fraudulent financial statements (our reports are audited annually by KPMG, who can support that). What we can admit to, which 95% of early stage tech companies can as well, is to historically have been overly optimistic about our growth projections for the future, which we see that you have also found in an old pitch deck.

Regarding the financial numbers you mention, please also keep in mind that our reporting numbers are in DKK, not in USD. That is a major difference! We are a small company that has been operating with a deficit

# ROKOKO

30 days from now, on March 22, 2025, we will make a change in our **Terms** of Use.

*The most significant update focuses on the motion data that is created with Rokoko products. The change will allow us to leverage this data to enhance our products and services. This includes the possibility of sublicensing completely anonymized data to third parties, while ensuring that the data can never be redistributed in its original form. It opens the door for new opportunities and enables us to stay current and lead the development of our industry, together with our valued users.*

*You can review the full updated **terms** [here](#). By continuing to use Rokoko products after March 22, 2025, you'll be agreeing to the updated **terms**.*

*If you have any questions, please don't hesitate to reach out to us on [support@rokoko.com](mailto:support@rokoko.com) or as a reply to this email.*

All the best,

The Rokoko Team

**Trifork's acquisition of 22% of Rokoko Care and  
use of Plaintiff's data.**

898

899

900 Defendant says in 2022 they already had sold Rokoko Care to 8 municipalities. In  
901 2024, they sold 22% to Trifork, who admitted it came from the Rokoko data.  
902

903  
904

905 Trifork:

**About Rokoko Care (rokokocare.com)**  
Rokoko Care is a health tech startup offering a digital physiotherapy solution of the same name. This solution operates through a web portal for physiotherapists and an app for citizens. Physiotherapists can assign rehabilitation programs that citizens can easily access and follow at home. Rokoko Care's computer vision technology allows citizens to train in front of their phone, with the app live-tracking their movements. This technology enhances training completion rates, enabling physiotherapists to monitor progress remotely and support their expertise with data. Based in Copenhagen, Rokoko Care evolved from Rokoko, a tech company with a decade of experience in motion capture and customers in over 100 countries.

JUNE 12, 2024 PARTNERSHIPS

# Trifork invests in Rokoko Care to advance AI-based physiotherapy

## Trifork invests in Rokoko Care to advance AI-based physiotherapy

Copenhagen, 12 June 2024 – Trifork and Rokoko Care enter into a strategic partnership to offer digital physiotherapy treatment in patients' own home. With this strategic partnership and an investment that gives Trifork 22% ownership of Rokoko Care, both companies will work towards a shared vision of improving healthcare and quality of life through advanced technology.

This partnership furthers Trifork's and Rokoko Care's mission to address critical societal challenges with innovative solutions on both national and international levels. Trifork's over 20 years of experience in health IT, combined with Rokoko Care's pioneering computer vision technology—which tracks users' movements in real time via their phone cameras—ensures that Rokoko Care's digital physiotherapy platform can be accessible to everyone in need.

Karen Skjerbæk Jørgensen, CCO for Trifork Digital Health, states:

*"With an aging population and increasing demands on a strained healthcare system, there is an urgent need for digital home treatment solutions. Rokoko Care's platform complements Trifork's portfolio of health solutions, which support home-based treatment and the entire patient journey. A significant technical advantage is that Rokoko Care's computer vision technology operates on citizens' own devices."*

For over two decades, Trifork has developed and implemented innovative digital health solutions in Denmark, including the Shared Medication Record, the My Doctor app, and the Telma solution. This extensive experience will enable Rokoko Care to elevate their physiotherapy solution to the highest level. Rokoko Care brings deep insights into physiotherapy, along with advanced motion capture technologies, combined with computer vision and AI, which can introduce new opportunities to Trifork Digital Health.

Jesper Grankær Carøe, CEO Trifork Digital Health, adds:

*"Developing and implementing digital solutions that meet the demands of both the public and citizens is always challenging. Our extensive experience with numerous solutions for municipalities, regions, and agencies will help Rokoko Care maximize the value of their innovative platform."*

Jakob Fisker, CPO and co-founder of Rokoko Care, states:

*"Rokoko Care introduces a valuable tool for clinical practice that facilitates physiotherapeutic rehabilitation for patients in their own homes without compromising healthcare quality. This solution provides objective data, enabling physiotherapists to personalize treatments for each patient, thereby enhancing the quality, flexibility, and effectiveness of care. Consequently, treatments can be conducted more frequently wherever the patient is—at home, at work, or even at a vacation home. This level of flexibility is highly desired by patients."*

Matias Søndergaard, CEO and co-founder of Rokoko Care, adds:

## We move on the world's most powerful dataset of human motion

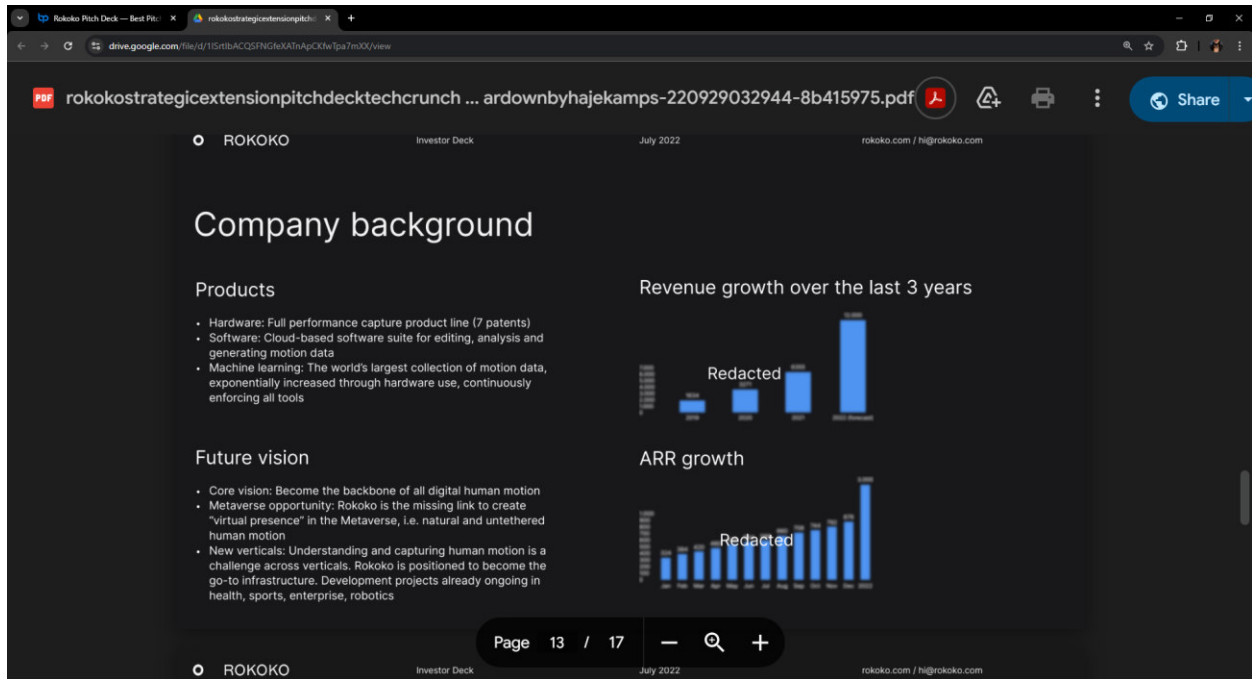

With the largest fleet of mocap systems in the market, we collect motion data that exponentially improves our ability to distill digital movement through machine learning.

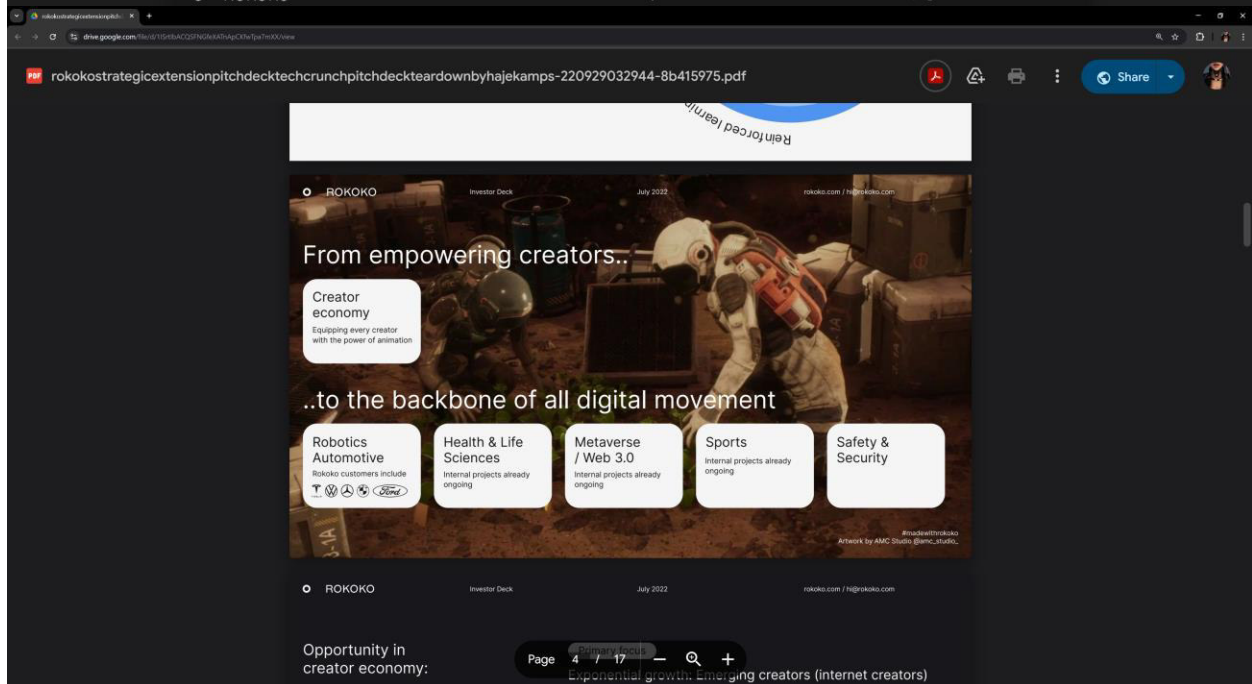

Year	Number of mocap systems in the market (K)	Number of assets created by our users per year (M)
2021	~10K	~10M
2022	~20K	~20M
2023	~40K	~40M
2024	~80K	~80M

945

946

947

Year	Funding Round	Pre-money valuation	Lead Investor
2019	Funding to date	> \$20M	North-East Venture, VF Venture, Kickass Capital
2021	Series A	\$40M	VF Venture
2022	Strategic round	\$80M	
2023	Series B	\$25M	

948

**Products**

- Hardware: Full performance capture product line (7 patents)
- Software: Cloud-based software suite for editing, analysis and generating motion data
- Machine learning: The world's largest collection of motion data, exponentially increased through hardware use, continuously enforcing all tools

**Future vision**

- Core vision: Become the backbone of all digital human motion
- Metaverse opportunity: Rokoko is the missing link to create "virtual presence" in the Metaverse, i.e. natural and untethered human motion
- New verticals: Understanding and capturing human motion is a challenge across verticals. Rokoko is positioned to become the go-to infrastructure. Development projects already ongoing in health, sports, enterprise, robotics

**Revenue growth over the last 3 years**

**ARR growth**

949

950

951 Some of the falsities presented to investors:

## Rokoko at a glance

Rokoko transitioned from leasing space in a co-working office in San Francisco, California to a completely virtual office.

Rokoko's motion capture tools are used by 30,000 creators and studios worldwide. - Dec 2021

Founded in **March 2014**  
 Copenhagen, Denmark

**Offices in**  
 Copenhagen (HQ), Athens, Tokyo & San Francisco  
 (all are mail drops, HQ is a cellar)

More than **50,000** Users in 100+ countries - Mar 2022, they got all those users back and MORE! Amazing!  
 Today, more than 10,000 creators—from the world's biggest studios to independent artists - Jan 2022, somehow they lost 20,000 users in just weeks

**60-70%** Of users are one-man-army creators

**80** Employees in total (60% engineers)

10. Rokoko has one employee in California, who reports to Rokoko's CEO and myself in Copenhagen.

include:  
 AIRBUS SONY  
 Adobe Microsoft

4. The office in Denmark houses approximately 30 employees, including Rokoko's Founder & CEO, myself, and other senior level executives.

**Staff costs**

	2023	2022
DKK		
Wages and salaries	27,662,363	24,393,440
Pensions	695,478	1,202,612
Other social security costs	410,866	409,468
	<b>28,768,707</b>	<b>26,005,520</b>
Average number of full-time employees	45	46

**They told investors 80 employees but their financial audits show only 46 in 2022 the year the pitch deck was written**

# ROKOKO

30 days from now, on March 22, 2025, we will make a change in our **Terms** of Use.

The most significant update focuses on the motion data that is created with Rokoko products. The change will allow us to leverage this data to enhance our products and services. This includes the possibility of sublicensing completely anonymized data to third parties, while ensuring that the data can never be redistributed in its original form. It opens the door for new opportunities and enables us to stay current and lead the development of our industry, together with our valued users.

You can review the full updated **terms** [here](#). By continuing to use Rokoko products after March 22, 2025, you'll be agreeing to the updated **terms**.

If you have any questions, please don't hesitate to reach out to us on [support@rokoko.com](mailto:support@rokoko.com) or as a reply to this email.

All the best,

The Rokoko Team

Rokoko Electronics ApS

1010

1011

1012 Rokoko makes money from this data *today*:

A screenshot of the Rokoko website's 'How it works' section. The browser address bar shows 'rokoko.com/insights/introducing-text-to-motion'. The navigation menu includes 'Capture Tools', 'Software', 'Use cases', 'Community', and 'Resources'. The main heading is 'How it works'. A red box highlights the text: 'Text-to-Motion runs on a model trained on Rokoko's proprietary dataset, built from millions of high-quality motion recordings. When you type a prompt, the model generates a matching full-body sequence based on real human motion patterns - but never exactly like any assets it is trained on.' Below this, it says: 'Every generated clip can be previewed and exported like any other animation in Studio Preview. The current release supports single-character, full-body output, and we're continuously improving its range and realism through ongoing training.' At the bottom, there is a video player with the title 'Rokoko's Text-to-Motion is HERE | Rokoko Tutorial' and buttons for 'Watch later' and 'Share'.

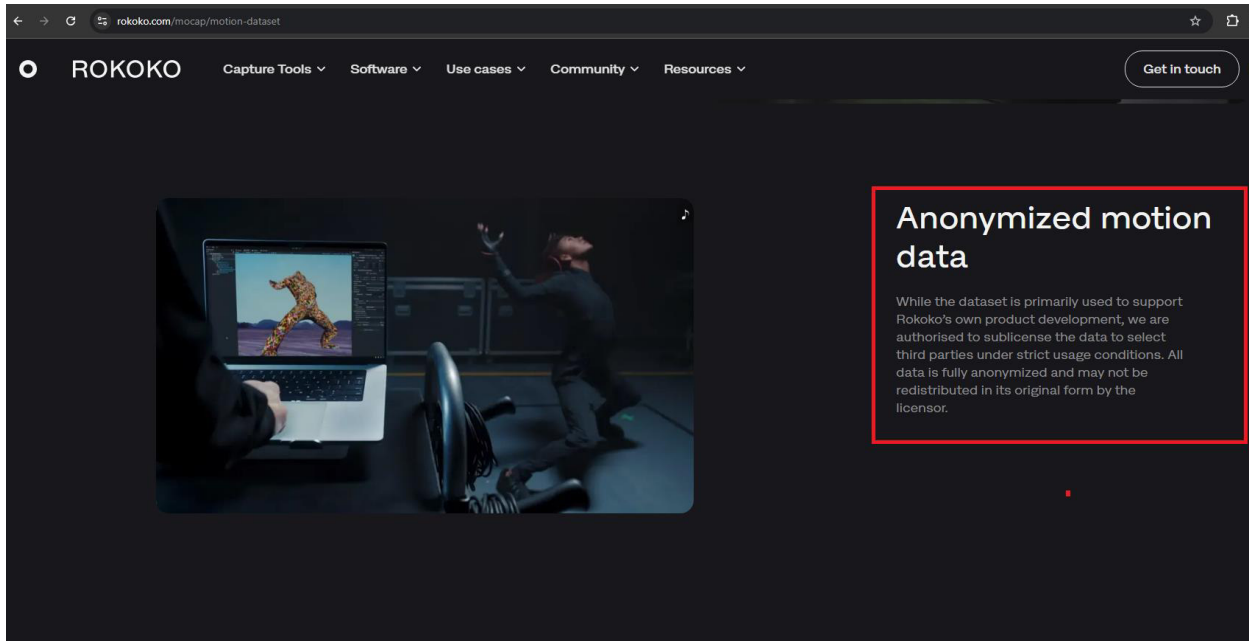

1013

A screenshot of the Rokoko website's 'Try it today' section. The browser address bar shows 'rokoko.com/insights/introducing-text-to-motion'. The navigation menu is the same as in the previous screenshot. The main heading is 'Try it today'. A red box highlights the text: 'Text-to-Motion is available now in Rokoko Studio Preview for all paid plans.' Below this, it says: 'Update to the latest version, open the AI Tools tab, and start exploring.' At the bottom, it says: 'We're releasing this early because we think it already saves time, and we want to shape its evolution together with the creators who'll use it most.'

1192 Defendant claims all updates are optional “from now on”, yet forces updates on  
1193 anyone who tries to use an older version

The screenshot shows a web browser window with the URL [support.rokoko.com/hc/en-us/articles/29606540466321-Rokoko-Studio-2-4-6](https://support.rokoko.com/hc/en-us/articles/29606540466321-Rokoko-Studio-2-4-6). The page content includes a header with navigation icons, a paragraph: "We hope you enjoy and as always, remember to share your thoughts and impressions", and two links: "Discord (general feedback, issues, etc.)" and "Productboard (feature requests and upvoting)". The main heading is "New features". Below it is a red-bordered box titled "General" containing a bullet point: "From now on, most updates will be optional and the user will be able to chose when to update Studio. There will be some cases where an update will be mandatory for compatibility reasons but in most cases it will not. Please note that this update is mandatory as it contains the groundwork for this feature." Below the box are three sections: "Coil Pro" with a bullet point about 3D error visualization; "Face Capture" with a bullet point about saving and managing custom face capture filter presets; and "Exports" with two bullet points about a new UE5 export preset and saving custom export settings presets.

Hi Matthew,

I just wanted to give you one more heads up about the Smartsuit Pro I coming to the end of its product life cycle.

From the 1st of October, your Smartsuit will no longer be supported by Rokoko Studio.

This doesn't necessarily mean that your suit will stop working. But it does mean that future updates for Rokoko Studio will not be tested for compatibility with the Smartsuit Pro I.

**The Smartsuit Pro I will continue to work in [Studio Legacy](#).**

Please also note that were you to opt for an upgrade to a Smartsuit Pro II, as an original suit owner, you would be able to claim a \$500 discount.

If you have any questions about this change, or would like to know more about the upgrade, please don't hesitate to let me know.

Best regards,

Connected - 100%

Reddit posts show other users SmartSuit Pro I's are still operable.

The screenshot shows a Reddit post in the r/vfx subreddit. The post is titled "Rokoko Smartsuit Pro I Performance Capture Suit with XL Fabric FOR SALE" and is from user r/vfx (35mmFilmsBloke) posted 1 year ago. The post content includes:

- Location: USA
- Rokoko Smartsuit Pro I with XL MoCap Fabric
- A red-bordered box highlights the following text: "Cinematic Motion Capture with a fully working MoCap Suit (Smartgloves available, inquire). In Excellent condition and Original Box - used twice on a show. The suit has the latest Pro 1 firmware and is eligible for upgrade. Great for someone starting in performance capture."
- The user explains they switched to Xsens and no longer use the suit, which includes sensors, a hub, and a MoCap headband.
- The price is listed as \$1700.00 firm.
- Additional details include: "You are buying from a business", "Can ship U.S. shipping free", "Secure Payment is made through Business Square, payable by CC, Debit, ACH", and "Mocap Smartgloves are also available."

At the bottom of the post, there are interaction buttons for upvotes (1), replies (1), and a share button.

Color: Black  
Connectivity: Bluetooth, USB 2.0, USB 3.0  
Country of Origin: United States  
Category: Electronics > Virtual Reality > Controllers & Motion Sensors  
Brand: Rokoko  
Manufacturer Warranty: none  
Compatible Model: Rokoko Smartsuit Pro XL  
Year Manufactured: 2022  
To Fit: Controller, Motion Capture  
Item description from the seller  
Rokoko Smartsuit Pro XL Motion Capture Suit + Smart Gloves + RAVPower Power Supply  
Condition: Practically New / Never Used  
This Rokoko Smartsuit Pro XL was purchased for a project but unfortunately I could not fit the suit properly, so it was never used in a motion capture session. The suit was only opened for inspection and testing.  
Because of this it is essentially like new.  
Everything is in excellent condition and has been stored safely since purchase.  
Included in this sale:  
• Rokoko Smartsuit Pro XL Motion Capture Suit  
• Rokoko Smart Gloves  
• Original Rokoko carrying case  
• RAVPower portable power supply / battery pack (used to power the suit during motion capture sessions)  
• Charging cables and accessories shown in photos  
• Original packaging components  
The RAVPower battery is included so the system can be powered and used wirelessly without being tethered, which is ideal for motion capture work.  
This is a professional motion capture system used for animation, game development, VFX, and virtual production.  
The suit was never used due to sizing, so this is a great opportunity to get a near-new Rokoko mocap system at a significant discount compared to buying new.  
Please review all photos for exact condition and included items.  
Ships carefully packed and fully insured.  
If you have any questions feel free to message me.

## **Corridor Digital / Rokoko Defamation**

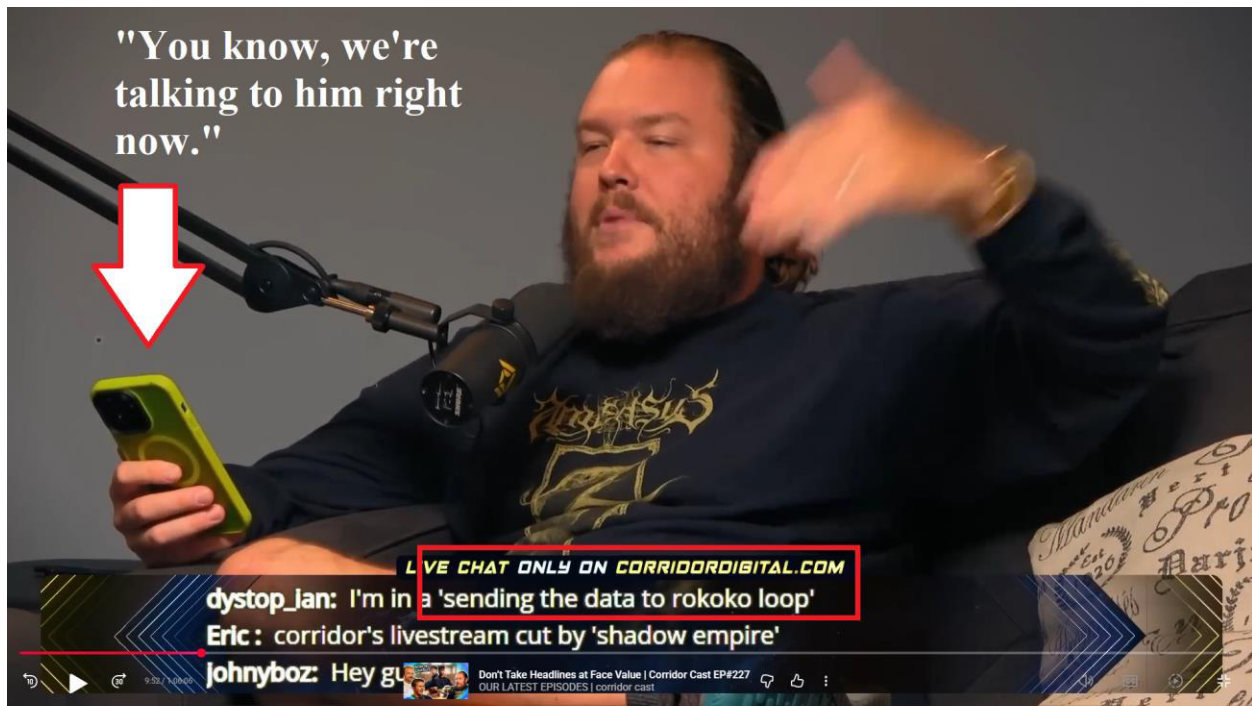

1290

1291

Cal. June 24, 2019); *In re Subpoenas to Global Music Rights*, 2019 U.S. Dist. LEXIS 235809 (C.D. Cal. Jan. 18, 2019).

Corridor is a business partner who works with Rokoko on a project-by-project basis. The terms of those contracts are confidential. Naver Z is an investor in Rokoko and has signed a Shareholder Agreement, which is confidential. The only contractual relationship that exists between Trifork and Rokoko is the sale of interest in Coco Care. The details of that sale are confidential. The terms of all of these agreements have always been confidential and not available to the public.

“ I filmed the Rococo brand integration yesterday....  
Yeah, I was going to say we just did a Rokoko....  
Because as again, I just filmed the brand deal for these guys...  
I was like, OK, as someone who literally is that close to it, I was like, I gotta figure this out.  
You know, we're talking to him right now.  
Lawsuit was not accepted.  
Yeah, not even accepted.  
But the last thing is they said he, he said he hired a private investigator.  
So this is the difference between like, oh, some guy with a bone to pick and someone who's unhinged.  
This guy's actually, this guy's actually unhinged.  
Like, I don't know what's wrong with him, but I think he's might be a little crazy because he said he, in his evidence, he said he hired private investigators to check out where Rococo's headquarters was and found that it was a, quote, 400 square foot empty office in a basement with no one there. ”

Sam caught a interesting headline about Rokoko Studio and a recent lawsuit... We Dive IN!  
Open Source Updates, A New Line-Wheeled E-Bike, and More!

1300

1301

1302

1303 **Partial Transcript:**

1304 “...I filmed the Rococo brand integration yesterday..... Yeah, I was going to say  
1305 we just did a Rococo....**you know, we're talking to him right now...**this feels SUS.  
1306 (suspicious)...Shadow Aliens Shadow. Empire...Because again, I just filmed the  
1307 brand deal for these guys...I was like, OK, as someone who literally is that close to  
1308 it, I was like, I gotta figure this out....I'm like, wait a minute...I think those are bot  
1309 comments... I think that's him using alt accounts just to like bump up the drama  
1310 and his threads because I mean, many people speculation... It's so easy to do that,  
1311 but The thing is like like Sam said, the guy who's filed the suit by the way, so he has  
1312 all the evidence listed on his site and I went and took a look actually... And he has  
1313 evidence of this, which is just his his computer's network traffic sending the data to  
1314 Rococo to use the cloud service... And it's one of those weird things was like a  
1315 single person just making mountains and mountains of data and text.... once you  
1316 actually like start to critically think about it, falls apart pretty quickly... There is 2  
1317 lawsuits, a state lawsuit and a federal lawsuit in the state...**Lawsuit was not**  
1318 **accepted. Yeah, not even accepted...**And so he alleges things like Rococo is  
1319 stealing your IP by downloading your motion capture data, ignoring the fact that  
1320 Rococo has a cloud service, This is what I'm saying, where you'll give it your  
1321 motion capture data, like literally... guys, this is BS... The one thing that was

1322 *really funny was the only thing, I mean, other than all the other stuff... **But the last***  
1323 ***thing is they said he**, he said he hired a private investigator.... So this is the*  
1324 *difference between like, oh, some guy with a bone to pick and someone who's*  
1325 ***unhinged....This guy's actually, this guy's actually unhinged... Like, I don't know***  
1326 *what's wrong with him, but I think **he's might be a little crazy** because he said he,*  
1327 *in his evidence, he said he hired private investigators to check out where Rococo's*  
1328 *headquarters was.. It's basically guys just **confused about the terms of***  
1329 ***service...It's yeah, it's like it's a, it's a weird like warrior type where it's like, I'm***  
1330 *going to mass this data, uncover this, like I've seen it before, you see it on these*  
1331 *various websites or somebody just makes like mountains and mountains of text and*  
1332 *like connections to like as many things and they'll put up like evidence... Sucks they*  
1333 *had to deal with all that BS.”*
